Facts and Figures:

Diploma: MSc Physics

Credits: 120 ECTS, 2 years (4 semesters)

Language

of instruction: **English**

Start: October (winter semester) or

April (summer semester)

Application

deadlines: 15 July / 15 January Requirements: BSc in Physics,

outstanding performance,

English proficiency

Study fees: € 1.500 per semester for international

students from non-EU countries,

no study fees for students from EU countries

Administrative

semester fees: € 161 per semester

Information on study fees:

https://www.studium.uni-freiburg.de/en/student-services/studv-fees

Monthly living costs in Freiburg are about €800 to €900 total.

How to apply (online only):

Within this application period, please register and log in to the online application portal (https://campus.uni-freiburg.de). Fill the required information and upload the requested documents:

- your undergraduate diploma (including translated copy in English or German)
- your transcript of marks / transcript of records (including translated copy in English or German)
- proof of English proficiency (B2-level), e.g. TOEFL, IELTS, or English medium of instruction certificate
- Curriculum vitae and Statement of Intent

Master of Science

Physics

University of Freiburg Institute of Physics

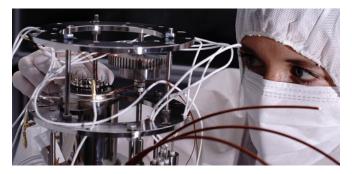

Albert-Ludwigs-Universität Freiburg

The Master Program

The English-taught M.Sc. Physics aims to continue, deepen and broaden studies begun at Bachelor level. It provides a comprehensive scientific education in advanced theoretical and experimental physics, covering state-of-the-art topics in the institute's core research areas Atomic, Molecular and Optical Physics, Condensed Matter and Applied Physics, and Particles, Fields and Cosmos.

In the first year of their studies participants extend their knowledge in advanced theoretical and experimental physics. During their final one-year research phase students will specialize in a particular field by participating in a cutting-edge research project at the Institute of Physics or one of the associated research centers and prepare their Master thesis. Successful students are qualified for independent research in physics and will be prepared for a scientific career in research, academia, or industry.

The Master program in Physics is designed for highly qualified graduate students. Participants will have the opportunity to

- be involved in cutting-edge research on forefront topics in modern physics.
- benefit from supervision by internationally renowned professors.
- participate in one of our international research training groups.
- live in one of Germany's most appealing cities.

Freiburg City located in the Black Forest

Module Overview

Advanced Quantum Mechanics (10 ECTS)

The Advanced Quantum Mechanics lecture is a compulsory course.

Total: 120 ECTS

Advanced Physics 1-3 (27 ECTS)

Choose from various lectures on Advanced Experimental or Theoretical Physics that provide advanced knowledge in the main research areas pursued at the Institute of Physics. Students may specifically select their desired topics in order to obtain a specialized knowledge in a particular field of physics. Most lectures are offered regularly each year.

Topic A: Atomic and Molecular Physics

- Advanced Atomic and Molecular Physics
- Advanced Optics and Lasers
- Theoretical Quantum Optics
- Quantum Information Theory
- Quantum Hardware

Topic B: Condensed Matter and Applied Physics

- Condensed Matter I: Solid State Physics
- Condensed Matter II: Interfaces and Nanostructures
- Theoretical Condensed Matter Physics
- Classical Complex Systems
- Complex Quantum Systems

Topic C: Particles, Fields & Cosmos

- Advanced Particle Physics
- Hadron Collider Physics
- Particle Detectors
- Astroparticle Physics
- General Relativity
- Quantum Field Theory
- Gauge Theories of Fundamental Interactions

Term Paper - Seminar (6 ECTS)

Choose from a range of seminar topics offered each semester.

Master Laboratory (8 ECTS)

Students perform advanced experiments covering current problems in physics, and learn experimental techniques and methods employed in modern research.

Elective Subjects (9 ECTS)

Choose from various master courses at the Institute of Physics and/or at other master programs at the University of Freiburg.

Research Traineeship (30 ECTS)

By participating in a current research topic students acquire advanced knowledge and prepare for their final Master thesis.

Master Thesis (30 ECTS)

Prepare your master thesis at the Institute of Physics or one of the affiliated research centers and institutes.

The Master's program offers the possibility for an optional specialization in a particular area of physics, such as **Atomic, Molecular and Optical Physics**, or **Particle Physics**, if the students choose their courses accordingly.

The Institute of Physics

With currently 22 professors, the Institute of Physics is actively involved in a wide range of modern research areas. Students benefit from this broad range of topics covered in lecture courses and seminars. The diversity and quality of the research and teaching program of our institute. embedded in the rich and interdisciplinary research landscape defined through the university and other institutions committed to research and development in the larger Freiburg area are key ingredients for the attractiveness of the institute nation-wide, but also on the international level. At present, 570 students are enrolled for Bachelor and Master studies, 130 students work on their PhD, and more than 70 young researchers are at the PostDoc stage of their career. The Institute of Physics succeeded to establish internationally well-recognized Research Training Groups Research Units providing first class post-graduate training.

Physics Institute and "Garden of Physics"

Freiburg and its University

Freiburg: best known for its high quality of life

The so-called Capital of the Black Forest enjoys more hours of sunshine than any other city in Germany and has a unique and charming atmosphere. Globally, it is also known as the "Green City" because of its high standards in environmental sustainability. Freiburg's surroundings offer excellent facilities for skiing, hiking, cycling and mountain biking. With a total of 30,000 students in a population of 224,000, Freiburg is clearly a student town.

The University: a venerable and international institution Founded in 1457, the University of Freiburg is one of the oldest and most renowned higher education institutions in Germany. We have partnerships with top universities, research institutions and businesses around the world and are proud to be a truly international university. With close to 3,500 international students and many internationally acclaimed scholars, the university offers a cosmopolitan and diverse atmosphere.
